

Westgate Resorts Leads Timeshare Industry with Floor Safety Programs

Walton, Kentucky; November 15, 2011-Westgate Resorts, the world's largest privately held timeshare company, continues to be recognized as the leader in its industry for floor safety programs. After implementing a certified walkway floor safety program nearly 5 years ago that was recognized by insurance underwriters, as well as the National Floor Safety Institute, (NFSI), Westgate continues to demonstrate that safety for their guests and owners is second to none.

At a recent safety conference held at Nu-Safe's Headquarters, Ms Patti Fisher, President and CEO of Nu-Safe Floors, stated "Westgate Resorts is an absolute success story on how a company can make floor safety a priority". Ms Fisher continued, "Nu-Safe works with thousands of properties that include casinos, restaurants, grocery stores, retail centers, and hospitals. We provide products and strategies that reduce slip and fall injuries. I can say unhesitatingly that Westgate Resorts leads the way in floor safety for its guests and employee's".

Over the past 5 years, Westgate has won several awards for safety in the workplace. With millions of owners and guests visiting their many resorts nationwide, keeping floor safety front and center has helped avoid slips and falls on all types of floor surfaces. From supervisors to front line team members, Westgate has established a culture that focuses on safety. Their programs include using chemicals that increase traction, regular monitoring of the wet slip resistance of the floors, and safety training and education of their staff.

Westgate Resorts has been chosen to receive Nu-Safe's Annual Floor Safety of the year Award for 2012. "The overall commitment to floor safety demonstrated by Westgate's Director of Risk Management, Mr. Brian Siegel, continues to show that slips and falls can be addressed and reduced with due diligence and determination" said Ms. Fisher. "We are pleased to present this award to Westgate Resorts for its successes over the past five years and look forward to keeping safety in first place".
